Restructuring in Global Aluminium

A new look at the past-and the future-of the aluminium industry

The relative calm of the aluminium industry during the 80s has been superseded by the dramatic changes of the 90s. But what does the future hold for this industry?

Restructuring in Global Aluminium, a new book published by Mining Journal Books and edited by Professor Bonnie Campbell and Magnus Ericsson, takes a new and revealing look at the aluminium industry. By examining corporate and state control in-depth from a historical perspective, and by arguing that the geographical evolution of both production and control must be studied on a dynamic basis, the book provides a reassessment of restructuring and offers predictions for the future of the industry that no organisation can afford to ignore.

Chapters are written by authors with wide experience and knowledge of each particular country/subject. Covering four countries: Australia, Canada, Jamaica and Guinea, plus theories for restructuring, the authors offer facts, statistics and their own interpretations as to why each country has succeeded, or indeed failed, in realising the full potential of its bauxite resources.

Introduction

Chapter I Corporate Structure

Chapter 2 The Process of Geographical Relocation

Chapter 3 Guinea Chapter 4 Australia

Chapter 5 Jamaica

Chapter 6 Modernisation in Quebec

Chapter 7 Local Communities in Quebec

Conclusion

Detailed maps, statistics and diagrams are also included.

The Authors

Professor Bonnie Campbell, Professor, Universite du Quebec Greg Crough, Senior Research Fellow, North Australia Research Unit Magnus Ericsson, Partner, Raw Materials Group Christiane Gagnon, Professor, Universite du Quebec

Dr Richard Howitt, Co-ordinator of the Resource &

Environmental Management Program, Macquarie University
